Penetration Testing Services

Skillfully pick cyber locks, revealing cracks before criminals exploit, safeguarding your digital world.

Customer Challenges in Penetration Testing

When it comes to penetration testing from a customer's perspective, two significant challenges are often encountered: securing enough skilled personnel and obtaining support from qualified third-party providers. Customers may struggle to hire experienced penetration testers who are essential for conducting thorough and effective security assessments. Additionally, finding and integrating third-party experts who can offer specialized knowledge and additional resources to the testing program poses another hurdle. These challenges can hinder the effectiveness of penetration testing efforts, impacting the overall security posture.

HIRING ENOUGH SKILLED PERSONNEL TO DO THE TESTING[1]

2022	36%
2021	48%

GETTING QUALIFIED 3RD PARTIES TO DO THE TESTING[1]

2022	45%
2021	44%

Our Methodology

- Pre-Engagement
- Intelligence Gathering
- Threat Modelling
- Vulnerability Analysis
- Exploitation
- Post-Exploitation
- Reporting

Why Satius

Satius Security is a provider of Turn-Key Solutions, and Professional Services. At Satius, we don't just offer penetration testing services; we deliver peace of mind. What sets us apart is our relentless commitment to excellence, fueled by a team of seasoned cybersecurity experts armed with the latest tools and certificates: (OSWE, OSCE, OSCP,OSEP and CRTP) we don't just safeguard your assets; we empower your organization to stay one step ahead in the ever-escalating cyber arms race. Performing real-world attack simulations to test defenses and uncover actual risk from the perspective of a motivated attacker.

Expected Outcomes

- After engagement support
- Detailed reports
- Performed by qualified penetration testers
- Customized attacks
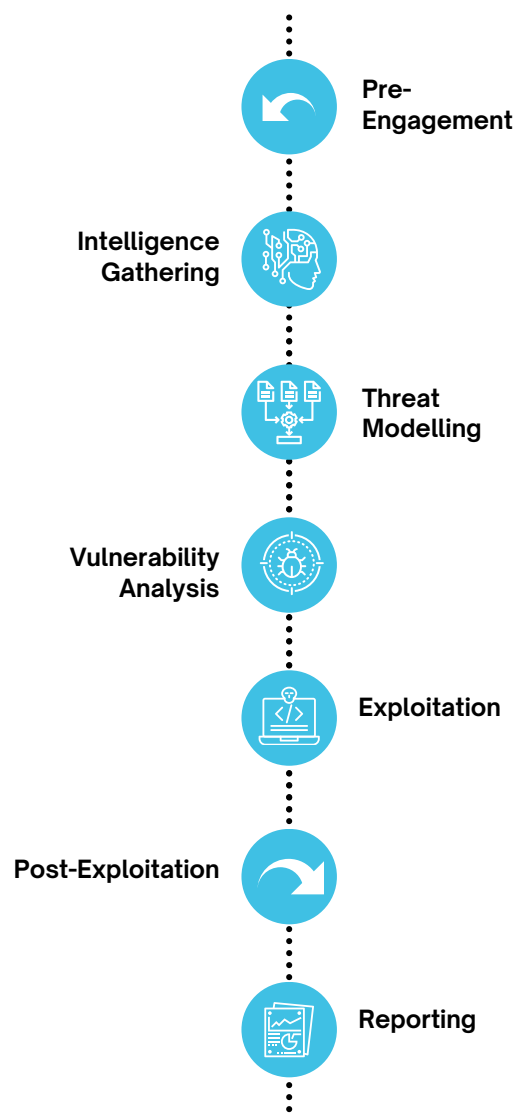

Range of Penetration Testing Services

External Penetration Tests

Shows the real impact of risks came from the Internet. Helps to meet all compliance requirements Identifies new exposures Justify your security investments (ROI).

Vulnerability Assesment

Empower your organization's security posture with our thorough vulnerability assessment service, identifying weaknesses and fortifying defenses against potential cyber threats.

Internal Penetration Tests

Shows the impact of compromised endpoints. Simulated real Attack-Defense exercise which allows to prepare internal IT team or test your MSSP in identifying and reacting on real cyber attacks.

Red Teaming

Harness the power of adversarial simulations with our red teaming services, illuminating weaknesses and empowering proactive defense strategies against advanced cyber threats.

Web Application Assessments

Evaluate your application's security posture thoroughly by subjecting it to rigorous assessments, such as crash and load testing, to fortify its defenses proactively and deter potential hacker interest.
Mobile Application Assessments

Enhance the security of your mobile applications with our comprehensive penetration testing services, uncovering vulnerabilities and fortifying defenses against potential cyber threats.

Phishing Attacks

Through our realistic phishing simulations, gain hands-on experience that enhances your team's ability to detect and respond to malicious email threats effectively, thus fortifying your company.
